RESPONSE to RESTRICTION REQUIREMENT with TRAVERSE

Honorable Assistant Commissioner for Patents
Washington, D.C. 20231

March 11, 2006

Sir:

Applicant accepts the restriction requirement of Examiner Musser in the Office Action of March 6, 2006, but with traverse. Examiner Musser considers Category I to have 3 patentably distinct species that she has designated as A, B, and C. There is an overlap between species B and C in that the nuggets on the bonded plates can be shaped either by heat alone or by heating them and by the application of shaped molds that are can be part of an extrusion die-like process that cross-cuts and shapes the nuggets making them flow under the action of both heat and pressure.

Nevertheless, in the interest of conciliation and moving forward on the merits of this application, applicant chooses Category I and Species B of Examiner Musser consisting of Claims 11 - 16. Claims 1 - 10, and 16 - 22 are hereby cancelled. New claims are consonant (readable) with the elected Species B. Independent Claim numbers are in Bold Font to make them easy to spot.
